

# Máquina de Chicles

(Gum Ball Machine)

This game is a number bingo in disguise!

Materials:

scissors

crayons, color pencils or markers

To make this game:

1. Photocopy the gum ball machines in card stock. (One for every player.)
2. Photocopy Chicles 1 once. Copy Chicles 2 for every player. Cut all of them out. Place every copy of Chicles 2 in an individual bag. Add 2 numbers from Chicles 1 into each individual bag.
3. Photocopy Chicles 3 twice. Cut out one copy and place them in a bag. These gums will be used to call out. The other copy will be the gum keeper, to keep track of what gums you have called out.

To play:

1. Give every student a gum machine copy and an individual bag.
2. Explain to them that they'll be playing a version of bingo, where you will call out numbers, and they must glue the gum ball into their machine.
3. If you have time you can ask them to color the gums and the machine before the game.

Tips:

- Included is a worksheet where students can write out some of the numbers in their gum machine in Spanish, as an extra practice.
